IT'S SIMPLE.

NetClient CS portals are easy to use. Simply visit our website and:

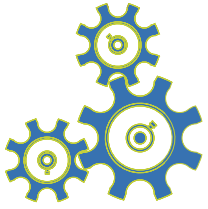

1. Click on the "client sign-in" link.
2. Log in using your personal ID and password.
3. Use your online accounting services.

Taking care of your accounting needs shouldn't take over your life. Between work, workouts, getting the kids, and getting to the grocery store, we understand that finding time to contact our office may seem impossible.

Now you can visit our 'virtual office' for the services you need via our website—anytime and anywhere you choose—through your personal, private NetClient CS portal.

NetClient CS frees your time, so you can focus on keeping your business competitive—not waiting for phone calls, files, or faxes. Now that's smart... and true time savings!

IT'S SMART.

Whether you're busy running your business, or running to keep up with a busy schedule, time is one of your most valuable assets.

Your personal, private NetClient CS portal provides you with instant, 24/7/365 access to your accounting and financial information online—any time—day or night—from anywhere you have an Internet connection.

IT'S SECURE.

The infrastructure at the data center features:

- **Built-in redundancy**, which allows for maintenance with minimal service interruptions to the end user
- **Secure password protection** for local and remote access
- **128-bit encryption**

When using your personal **NetClient CS** portal, online accounting services, and **CBS ASP**, your work is in the most secure location available—the **Class-IV, IBM-certified data center**, one of the **20 largest data centers in the world**.

If you are investing or banking online, then you are already familiar with using web-based portal technology.

NetClient CS portals allow you to take advantage of the same Internet technology that banks and other financial institutions use, to give you around the clock, online access to our accounting and financial services.
